GO² Move Rectangular
Multi-Monitor WorkCenter

GO² Move Rectangular Multi-Monitor WorkCenter

> No matter your space requirements or cost limitations, the GO² WorkCenter designs are flexible enough to fit any space and any budget. User-centered design features include motorized work surface height adjustment, individually programmable sitting and standing positions and a softform ergonomic edge.

> The GO² WorkCenter's exclusive floating rail system, with our 360° rotational, pneumatic height adjustable LCD arms, allows for precise ergonomic adjustment of flat panel monitors; which helps provide optimum monitor sight lines to relieve neck and eye strain. Telephone and dictation equipment can also be precisely positioned. All of which opens up additional workspace for administrative tasks.

> The exclusive cable management system allows easy access for IT staff and keeps knee space clean and clear.
