

divider systems

Workspaces influence the work of the people who use them. A good one will foster innovation and productivity. A poor one will be a drag on those things. Dividers from Corona Group combine glass or porcelain marker boards, tackable boards, decorative glass and acoustic panels into architectural elements that open and close off areas.

They empower your people by helping them to focus, capture and share ideas more efficiently. They can make your workspaces work harder. And be more agile. Here are some of the ways they do it.

### Intersection Space

A framed divider system that allows you to create defined spaces within an environment; for isolation, small meetings, intimate presentations, brainstorming or, to simply “thin” the density of benching stations in a particular area. Shown in Black Powder Coat Frame and CPS Porcelain Media Wall.

### Intersection Stack

A sliding, center-pivoting top-hung divider system that allows individual panels to pivot and stack against each other all along the track system.  
Shown with Anodized Aluminum Frames and CPS Porcelain Panels.

### Intersection Panels

Panels are available in sizes up to 4 by 10 feet.  
Shown with Double-Sided Porcelain Markerboards, Custom Metal Cut-Outs  
and Black Powder Coated Frames.

### Intersection Flex

Free standing panels are available in various heights and widths to provide custom dividers for specific needs. Panels available with glass or porcelain-steel marker boards, Acousticator Felt panels, or decorative glass panels.

Shown in Black Powder Coated Frames, Acousticator Panels, Frosted Glass Panels and Decorative Glass Inserts.

### Intersection Slide

Top Hung Sliding Panels open and close off areas and make your space more versatile.

Sliding dividers shown with Porcelain Panels, Fabric Tackable Panels, Acousticor Panels and Black Aluminum Frame.

### Intersection Weave

Dividers can be customized with a variety of pliable materials such as Wood, Metal, Felt and Acrylic inserts to define and enhance a space. Shown with Wood Panel Inserts and Satin Anodized Aluminum Frame.

### Intersection Slide

Top Hung Sliding Panels give you multiple layers of presentation surface. Shown with Porcelain Steel Markerboards, Acousticor Panels, Mesh Inserts and Black Aluminum Frame.

### Intersection Divider System

Because Intersection dividers aren't bound to a wall, both sides are available as work surfaces. Shown with Double-Sided Glass, Mesh Inserts and Black Aluminum Frame.

### VIP+ Sliding Wall Panel System

With sliding dividers that reach from floor to ceiling, you get open space when you want, privacy and quiet when you want. Top Hung System  
Shown with Double-Sided Sliding Porcelain Markerboards and Acousticor Felt Panels.

### VIP+ Sliding Wall Panel System

VIP+ panels make the "in-between" spaces into flexible communication tools. Shown with Triple Track Bottom Rolling, Double-Sided Sliding Porcelain Markerboards and Tackable Fabric Panels.

### VIP+ Sliding Wall Panel System

Glass panels are available in hundreds of background colors. We can even match your paint samples or add custom graphics. Shown with Triple Track Top Hung Two-Sided Glass Markerboard Panels in designer specified color.

### VIP+ Sliding Wall Panel System

VIP+ Sliding Wall Panels turn exterior glass walls into functional working surfaces. Shown with dual track Bottom Rolling Porcelain Markerboards and Customized Acousticor Sound Absorbing Panels.

### VIP+ Sliding Wall Panel System

We have the experience to help you use our dividers in the way that best enhances your workflow, space, time and productivity. Available as Top Hung or Bottom Rolling Systems. Shown with Sliding Porcelain Markerboards and Cork Panels.
