

Are you still writing over the ghosts of words past?
Then it's time to move on from wall applied writing surfaces.

Non-Magnetic, Porous,
Wall Applied Writing Surface
with Limited Warranty

VS

Magnetic, Non-Porous, Full coverage,
Projectable, Porcelain Steel Writing Surface
with Forever Warranty

Writing on a porous writing surface that, as you use it, continually gets darker and darker with marker staining? Want to restore the surface? You have to reapply the film or repaint the wall, basically investing in a total new product application.

With CPS Porcelain Enamel Steel Markerboards from Corona Group, you install it once. It's a truly optimum, non-porous writing surface with a lifetime warranty against delamination and discoloration. It's magnetic, scratch proof and impact resistant. Our EXIMO Cleaning System* removes all marker stains—even permanent marker (the marker ink sits on top of the enamel steel surface), to keep your initial investment in pristine writing condition, and maintain clear readability. (See our comparison chart on page 2)

So maybe it's time to give up the ghosts.
