

Introducing Merge Rail

Merge Rail

- > Introducing **Merge Rail**—A presentation system for individual and group settings, incorporating a variety of materials, a sliding rail system, and a personal, transportable markerboard/tackboard component that is lightweight, frameless, flexible in size and reversible.
- > **Merge Rails** are designed to mount directly to the wall. The 1.5" square aluminum profile creates unbroken, horizontal lines while keeping all boards and panels in order and easy to mount, relocate and remove. Using its versatile slot positioning, boards can be placed inside the tracks or they can hang on the face of the track and slide. The System can utilize a 2 or 3 rail configuration based on the user's requirements.
- > **Merge Rail Component Boards** are designed to offer the best Porcelain Steel Writing Surface (lifetime warranty), and Acoustacor, our Felt PET acoustic/tackable material, that can be disinfected and bleached without harm or discoloration. Boards can be customized to various sizes to integrate into our INTERSECTION product group or in conjunction with Media Wall and Merge Wall Mounted products. In most cases **Merge Rail** can be configured to work with your current furniture/wall systems.
- > **Merge Rail Component Boards** are also available with handles and drillings for ease of transport and use. Two Styles of handles are currently available and may vary according to the size of the board and the user's preference.
- > **Merge Rail Mobile Screen/Cart** is an integral element within the system, as it can function as a simple two-sided mobile screen, and also as a transport system to relocate boards from brainstorming areas to presentation areas. Each cart can hold up to 8 full size boards.
- > **Standard Frame Finishes:**
Satin Anodized Aluminum; Black Powder Coat – (see Corona Group Specifying Tool Kit – Profiles Box).
- > **Standard Panel Materials:**
CPS Porcelain/Acoustacor Felt Panels – (see Corona Group Specifying Tool Kit – Surfaces Box).
- > **Custom Panel Components:**
Always being open to new designs and materials, whether you are creating a functional presentation system or a decorative or Acoustic element, the possibilities are endless – (contact Corona Group for more information)
