

VIP Framed Glass Boards

VIP Framed Glass Boards

- > Framed VIP Glassboards harmonize beautifully with the matte anodized aluminum frames in the VIP Series. Glassboards come in a variety of sizes and colors. They are constructed of safety or tempered glass; the thickness of the glass is .25". Concealed mounting brackets allow the board to mount in the traditional VIP manner; as if it's "floating."
- > VIP Framed Glassboards come in two configurations: with a single rail top track that allows for creating a bi-level presentation system; and a double rail top track that allows for a tri-level presentation system. The double rail track also includes ball bearings for hanging paper.
