

GO² Workcenters SmartManage
Cable Management System

SmartManage Cable Management System

> SmartManage® means a free and clear work-space. With cables and outlet strips contained in a specially modified, integrated tray located at the rear of the workcenter, The work surface remains clear with unobstructed access. This is mandatory for a balanced and aligned work posture. It also allows the user to customize their own workspace for whatever their needs.

> SmartManage® also allows easy access for the IT staff meaning they can work on the systems standing up. And it keeps users knee space clean and clear.
