

Why write over the ghosts of words past?
Erase what you write.

VS

Wall Applied Writing Surface

Markerboard - e3 Porcelain Enamel Steel

Why would you apply a porous writing surface that, as you use it, continually gets darker and darker with marker staining? And the only way to restore the surface is to reapply the film, basically investing in a total new product application.

The coronaVISUAL e3 Porcelain Enamel Steel Markerboard is a truly optimum, non-porous writing surface that comes with a lifetime warranty against delamination and discoloration. Plus it's magnetic, scratch proof and impact resistant. Use our EXIMO Cleaning System* on coronaVISUAL Markerboards and remove **all** marker stains—**even permanent marker**, because the marker ink sits on top of the enamel steel surface. Thus keeping your initial investment in pristine writing condition, and maintaining clear readability.

So the question becomes, are you ready to give up the ghosts?
